

**Does LERA include GMO ingredients?**

A very good question. We are very proud to say and certify that LERA® Adaptogen Blend is non-GMO compliant. There are no genetically modified organisms in any of ingredients in LERA. All of the herbs used are wild-crafted, that is to say grown in nature and not cultivated. The Russian Federation recognizes wild crafting as being the same as organic. We comply with all the technical conditions required under the pharmacopeia articles for harvesting and manufacturing the LERA blend.
